

Shift Bidding

Automate your shift bidding process to award error-free and compliant long-term schedules in a fraction of the time

Benefits

- Save both schedulers and employees hours of work with shift bidding automation
- Minimize human errors in ranking and awarding bids
- Meet union rules and adhere to Collective Bargaining Agreements (CBAs)
- Protect against bias and perceptions of favoritism with fair and transparent processes

[Aladtec] makes the shift bidding process a lot more manageable. It has saved me days of work. It makes it easier for my employees to be able to log on to a system that they are already familiar with and bid right there. The other part for me, as a scheduler, is that it takes away the human error factor from creating a spreadsheet and collecting the bids. Once the bids are done and approved, it goes right into their lines, and I don't have to spend another several hours putting them in.
